IMPROVE CONTROL, INCREASE EFFICIENCY WITH THE XCN-1050 EZ-PILOT BUNDLE

XCN-1050™ EZ-PILOT® BUNDLE

Kit Includes

- XCN-1050 display kit
- NAV-900 guidance controller kit
- EZ-Pilot kit (SAM-200, IMD-600 and cabling)
- NAV-900 to EZ-Pilot harness
- EZ-Pilot replacement steering wheel

Part No. ZTN19912180SP

STOCK AVAILABLE

\$9,000+GST

OR TRADE UP & SAVE!
Save a further **\$1,700** when you trade in your old system*

Kit does not include NAV-900 EZ-Pilot licence or EZ-Pilot specific platform kit.
* Available on participating trade up products until 31 October 2023 or until stocks last.

UPGRADE YOUR PLM MODEM

What is MyPLM Connect?

New Holland developed MyPLM Connect as a Farm Management Information System that puts operators in control of their farm from any device, anytime, anywhere around the world. Through integrated solutions that link Farm, Fleet & Data, MyPLM Connect helps optimise time by delivering information to make informed agronomic decisions.

Get your equipment connected for these benefits:

- Accurate data collection through the new MyPLMconnect suite - Farm, Fleet and Data.
- Open - fully compatible with all brands of machine and implement. Giving you the flexibility to pick the right machines for your farm. Always.
- Connected - By keeping an eye on the online vehicle dashboard you can maximise uptime, improve productivity and efficiency and even optimise fuel consumption.
- Smart - An intuitive in-cab display means operators can efficiently browse key parameters and communicate with the farm.
- Supported - PLM Customer Support is always on hand to enable you to maximise the performance of your current package.

Part No. 51464593

Only suitable to CNH serial numbered equipment

RATE CONTROL MODULE

Features

- User-friendly universal controller for over 200 applications
- Flexible and very easy to use
- Easily manages up to five products
- 16-section control eliminates expensive skips and overlaps for all application phases
- Intuitive diagnostics and troubleshooting
- Compatible with ISOBUS Universal Terminals and Task Controllers
- P 67 environmental rating for the harshest of environmental conditions
- Dynamically configure run screen based on operator preferences to show most relevant data during operation.

McINTOSH & SON
www.mcintoshandson.com.au

CONTACT YOUR PRECISION FARMING SPECIALIST AT MCINTOSH & SON TODAY!

MNET

McIntosh & Son have invested in a premium RTK service, MNet. RTK (Real-time Kinematic Positioning) is a satellite navigation technique used to enhance the precision of position-data, such as GPS.

SERVICE & SUPPORT

MNet subscription service includes yearly visits to each site to make sure everything is running correctly and efficiently. McIntosh & Son will be managing farmers' subscriptions and overseeing the network once installed.

COMPATIBILITY

Machines and MNet are compatible and ready to go. All new machines can have MNet installed in them. Part of the way MNet works means using the modem to surpass the RTK message instead of having a vehicle radio module.

LOCATIONS

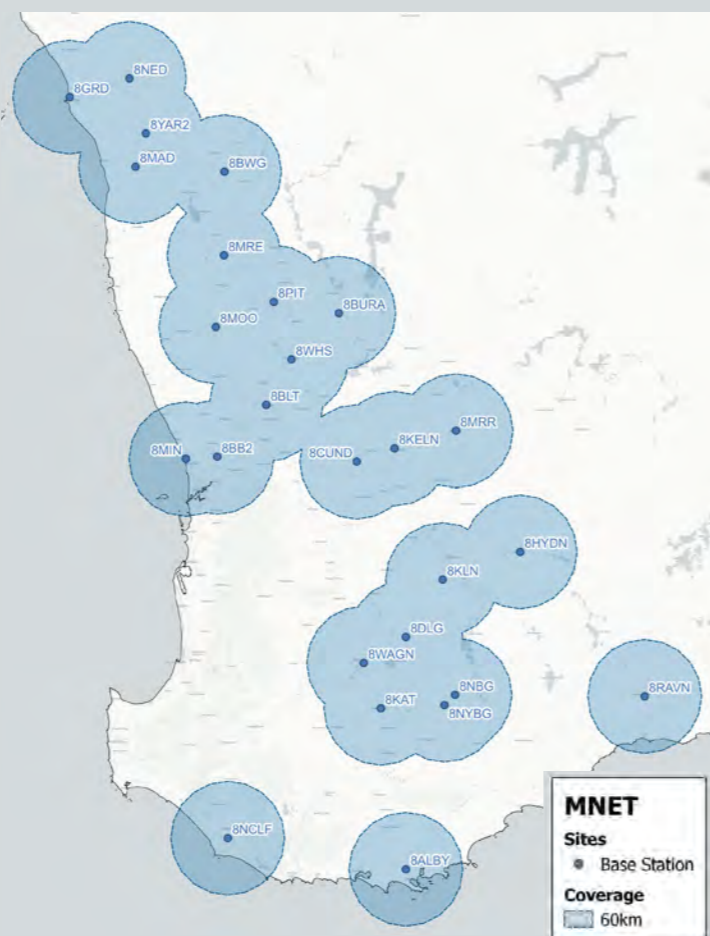

Current MNet base stations span as far north as Geraldton and Ravensthorpe in the south. McIntosh & Son plan to expand their network, and locations will be based on enquiry.

PRICE

MNet offers an affordable way to maximise the potential of your precision agricultural systems. It is an extremely cost effective tool for operators with multiple machines. An annual subscription is for FIVE logins (five machines at any one time) per year.

CONTACT

For further information about MNet, or to enquire about having a subscription on your property, contact the Precision Farming Specialist at your local McIntosh & Son dealership.

Crop Dividers

... with a difference

**PREVENT CROP DAMAGE AND
REDUCE YIELD LOSS UP TO 90%**

WITH E-KAY CROP DIVIDERS

WITHOUT E-KAY CROP DIVIDERS

ADJUSTABLE SETTINGS

Pivoting divider arm with minimal moving parts allows adjustment for different crop conditions

EASY INSTALLATION

Low maintenance, one operator can install in minutes with its fast-attach pocket mount

TRANSPORT FRIENDLY

Crop dividers easily lift out of the way for machine transport

SPRING LOADED

Spring loaded pivoting nose cone trips over obstacles such as wash outs and lodged materials to avoid collision damage during road crossings

BM1200S With Scales
\$15,150+GST

(NEW) SCALES

The viscosity of some chemicals can change greatly according to temperature. This can lead to inaccurate measurements using flow meters.

The weight of a chemical per litre never changes, simply measure a litre of chemical and multiply by the amount needed.

This results in more accurate measurements, cost savings, and efficient spraying.

SPRAYING

PARTS SALE ON NOW

HARDI CADET

This light trailed sprayer is an excellent alternative to small linkage sprayers, where capacity is essential but towing is preferred.

TEEJET SECTION MOTORS

The 340 series electrical regulating valves are designed to produce linear flow regulation and shutoff control in agricultural applications.

REGULATING VALVE - 1" BSP

Part No. B344BRL-24-03C
\$627.09+GST

SHUT OFF VALVE - 1" BSP

Part No. B344BEC-24-C
\$610.18+GST

Cover fits snugly over the motor cavity to reduce air space and eliminate condensation. It's sealed and sonically welded to comply with the IP67 rating for submersion under water.

Direct coupled visual indicator to verify position/operation. Yellow oval indicates 22 RPM motor. Yellow diamond indicates 25 RPM motor.

Permanent etched marking with complete motor number and date coded (year, month, day).

Double-wall construction of the gearbox increases strength and maintains permanent lubrication of the durable, all-metal gears.

Motor head assembly is easily detached by pulling a retaining pin allowing manual operation or easy replacement of the motor.

An internal fuse protects the valve and your electrical system, and it resets automatically by disconnecting power to the motor for 20 seconds.

Available for either positive or negative switched electrical systems with a sturdy, built-in double sealed grommet and flat gasket that seals the DIN connector versions. Motor and DIN cables are made of polyurethane.

McINTOSH & SON
www.mcintoshandson.com.au

Intelligent spot spraying system

-  Up to 93% herbicide savings
-  Green-on-green & green-on-brown weed detection
-  Live crop data as you spray
-  Weed mapping for future planning

HOW IT WORKS

EMBEDDED CAMERA NETWORK

A camera network is embedded directly onto the boom. Cameras are compatible with all boom sizes.

WEED RECOGNITION

An embedded computer, linked to the cameras, uses proprietary software to communicate with the sprayer. It analyses images of the field in real time while moving, recognising weed species present within crops.

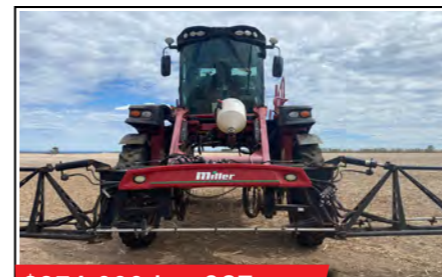

REAL-TIME SPOT SPRAYING

The on-board computer controls the spraying in real-time to identify and only spray chemical on recognised weeds. It can cut a section of nozzles, or work one nozzle at a time.

WEED MAPPING

Information collected in the plots is automatically and immediately transcribed in the form of maps. These maps can be integrated into the sprayer for further processing or in agricultural processes management software.

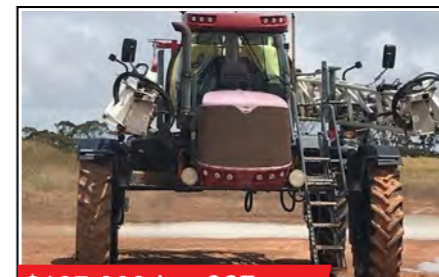

\$374,000 inc GST

2017 Miller Nitro 6333

380/105 tyres, 36m truss boom with 5 sensor Raven height control, 6100L tank, reverse fan, Trimble XCN 2050 autosteer, fence line jets, 70L scud mix tank.
