**BatchMaster  
1200**

The Spray Shop's Batchmaster is the largest chemical batching unit on the market holding 1200 litres. Designed and made in Australia using Australian steel, the Batchmaster 1200 is packed with unique features to streamline your on farm chemical handling.

Banjo Venturi Induction system for fast transfer from envirodrums and shuttles

Tank rinse valve for easy cleaning

Forklift slipper points and tie-down straps for easy transportation

Hot dipped galvanised frame

Fold down work platform

Twin 2" Banjo agitation valves

3" Banjo taps for fast and efficient transfer of mixed chemical to your boom spray

3" Banjo pump capable of delivering up to 1100 litres per minute

Easy start GX200 Honda Motor

## Features & Benefits

Batchmaster's fold down work platform provides stability and makes loading small amounts of chemicals safe and easy.

Batchmaster features twin lids - one is Spray Shop's patented knife system for fast loading of dry chemical from bags and a drum rinsing nozzle that ensures containers are left clean.

Complete agitation is handled by twin 2" valves, thoroughly mixing chemicals and circulating content every 90 seconds and eliminating undissolved chemicals.

Loading chemicals from enviro drums or shuttles is quick, easy and safe with the Banjo induction system.

BatchMaster  
1200

Batchmaster's new improved features include a washdown gun and operations tower with clearly marked taps. These modifications along with existing features, will save hours of depreciation on your machine and streamline your chemical handling issues.
